VOL. XVIII., No. 103. MONTREAL, FRIDAY, FEBRUARY 15, 1929. PRICE TWO CENTS

St. Lawrence Canal Project Not Beneficial

Arts '31 Argue Question Of Waterway Scheme

TWO DEBATES

Freedom Of Press Is Not Necessary Claim Speakers

"More than two-thirds of the Canadian wheat delivered in October, November and December is shipped by way of Buffalo to the east, and not through Montreal," stated Goodman yesterday in upholding the negative of the resolution "That the present adoption of the St. Lawrence Waterway Scheme would prove beneficial to Canada." This was the first of two debates held yesterday, the verdict in each case being in favor of the negative.

Future Problems

Eakin opened the debate with the argument that just as at the present day the American States near the Great Lakes cannot cope with their transportion problems, so in the future Canada will be faced with the questions. This immediately results in the necessity for canals which are quicker, cheaper and safer. Montreal, in the opinion of the speaker, will profit rather than lose by this scheme. The real danger lies not in building it, but in not building it.

Goodman, for the negative, asserted that the insurance rates in New York are comparatively low as compared with those of Montreal. He stated that most of the traffic is eastbound which results in ships being empty on return trips so that lower rates cannot prevail on canals, be they large or small. Shipping in Canada is decreasing instead of increasing. The cost of building a canal such as this is about one billion dollars a tremendous addition to the already immense National Debt.

Abundant Water Power

Challies the second speaker for the affirmative, argued that canal would provide abundant water power, which in itself will increase manufacture and ultimately solve the immigration problems. He stated that he project would repay sixfold and that it would pay for itself in 16 years.

David Lewis, for the negative stated that there is not a need at the present moment for additional navigation and hence no need for special canals. He argued that this project was suggested by the United States not with a view towards Canadian Welfare but with the intention of getting a firm grip upon Canadian Power interests. Canada is at present unable to build a Canal, and if she does, she will put herself in a position with the States which will endanger her autonomy.

Freedom of Press

The second debate was on the resolution that student publications

(Continued on page two.)

Novel Program For Alma Mater

Futuristic Design To Be Decoration Theme

The Alma Mater dance is just two weeks off. The plans of the committee are rapidly materializing. It is hoped to place the tickets on sale next Monday. The various council representatives will handle the sale of tickets in their respective faculties, the same system being in force as last year.

Plans for the decorations are being made by Ross and Abbott, of Architecture. They are drawing up a futuristic scheme which will be quite a novelty in the history of McGill dances. The program has been designed, and it is a fine piece of work and quite original. Many people are certain to ponder over it for some time before appreciating it in it's entirety. The music is certain to be good, as the Acadians Dance Orchestra has been engaged. They have played at a number of the large dances during the winter season.

It is unfortunate that the date decided upon in January should prove to conflict with other affairs, but the council had not been advised of this, and some arrangements had already been made before the matter was brought to the attention of the committee.

The dates of the ticket sale to the different classes will be announced on Monday.

Obsolete Laws Detected By U. Of Tennessee

SPECIAL TO McGILL DAILY

Memphis, Tennessee. — Tennesee, which only recently enacted a law prohibiting the teaching of the theory of evolution in public schools, is no exception to other states in having on its status books laws which time has made obsolete.

It is against the law to do any of the following:

Make a noise within 100 yards of a cemetery.

Allow a minor to play ten pins.

Give a man a drink around the state capitol.

Sell liquor to a drunkard.

Sell articles within a mile of a church unless it is an established place of business.

Own a cotton gin without a fence around it.

Buy hides from an unidentified person.

Fail to register a female dog with the circuit court clerk.

Sunday Named Day Of Prayer

McGill Students To Attend St. James The Apostle

INTERNATIONAL DAY

World's Student Christian Federation Calls For Universal Co-operation

Sunday, besides being the last day of the International Week at McGill, will be a special day for students all through the world. Under the auspices of the World's Student Christian Federation Sunday, February 17th, has been set aside as the day of International Student Prayer. In Montreal the McGill S.C.A. has co-operated with the churches of the city and McGill students are invited to attend the service in the Church of St. James the Apostle on St. Catherine St. at 7.15 p.m. A special portion of the church has been reserved for students.

The W.S.C.F. has recently met in India for its committee meeting and found that there is a rising tide of more acute nationalism that has ever been shown. The idea of brotherhood is alone found in its highest form in those countries which are economically powerful and military invaluable. From India and under such circumstances John R. Mott, well known leader in the W.S.C.F., issues his call for an international day of student prayer.

In the main the points of his theme for intercession are Thanksgiving, because of the good work that is being done and the fact that all four corners of the earth feel that they are mutual debtors to each other; Penitence, because of the lack of courage to face the Christian issues and the growth of hatred in certain spheres; Intercession, for boldness in standing fast by Christian loyalties in face of economic and nationalist pressure, and for the work and conferences that is being continued by the W.S.C.F. and kindred associations.

Taking as his example India John R. Mott points out countries in which

R.V.C. Shows Great Interest In Shooting

Evelyne Tidd Scores 64 Out Of Possible 70

According to the well-attended meetings of the M. W.S. Rifle Club, great interest is being shown in this sport by the R.V.C. students.

Three practices for the target-shooting have been held, at which the progress of the contestants has been satisfactory, according to Captain Pennell.

Twenty targets have been handed in with scores of 55 or over, out of a possible 70. The best contestants at these meetings were Evelyne Todd score 64 out of 70, Helen Cannell with 62 out of 70; Margaret Dodds and Isabel Holland equal, with 61 out of 70, and Doreen Harvey-Jellie with 59.

To the contestants handing in 10 tragets with a score of 55 or over a silver spoon is to be awarded. This has been made possible through the courtesy of the Dominion Cartridge Company.

Preparations For Big Show Nearing End

Futuristic Costumes Now Finished By Members

INSECT PLAY

Exchange Tickets Going On Sale Next Monday In Union

Preparations are rapidly approaching completion by the Players' Club in connection with the Insect Play which is being presented in Moyse Hall on Friday and Saturday of next week.

The large number of costumes are now all finished. Their futuristic tendencies will add a very novel feature to the play which presents a new type of drama in Montreal.

Rehearsals are being held in Moyse Hall which is a good indication of the fact that the show is being whipped into its final shape in readiness for presentation next week. The large cast has been practising for several weeks in order to master the complicated movements and precise acting that is required in the play.

Having allowed themselves ample time to work out all details, the production committee has omitted nothing which might give finish to the show. Owing to the aesthetic nature of the Insect Play, particular attention has been paid to the designing of scenery and costumes as well as with the general atmosphere of the play.

Th Insect Play is by no means a study in entemology as might be surmised by its title. On the contrary, it is a satire on human nature. It contains stirring scenes depicting the vain-glorious military movements and the futility of war. The struggle between the different races of ants, the commanding eloquence of their leaders, and the cold hard reasoning of their engineers are all impressive phases of a satire on war.

Exchange tickets are going on sale in the Union next Monday. These reserve tickets may be produced by students upon the presentation of the 65c student ticket which they receive from class representatives who have been selling them for the past two weeks. Reservations may be made by phoning the Union.

A full rehearsal including the prologue, Acts I, II, & III, and the epilogue will be held on Sunday.

Menorah Society To Debate Here

Annual Intercollegiate Meet To Be Held Here

The annual intercollegiate debate between the Maccabaean circle of McGill and the University of Toronto Menora Society will be held in the McGill Union Ball-room on Sunday, Feb. 24, at 3 p.m. The subject of the debate is: 'Resolved, that it is a sound policy to advance Zionism as a solution of the Jewish problem.' The affirmative will be upheld by McGill, which will be represented by A. M. Klein and D. Lewis. Toronto will be represented by H. D. Green and L. Herman, students at Osgoode Hall.

The annual debate between the Circle and the 'Varsity Menorah is an important event, held alternately in Toronto and Montreal. The victorious team is awarded the Bennett Cup, presented by Mr. A. B. Bennett, M.A., of Toronto. In the past, McGill has won the cup six times and Toronto once only. The Circle is now the holder of the cup.

The debaters are well known and are qualified to discuss the very important subject which has been selected. A. M. Klein, has been prominent in the Mock Parliament, and recently represented McGill in the debate with the Western Universities. David Lewis is also prominent on the campus as a debater and an officer in various organizations. The Toronto representatives are foremost debaters in the Law School.

The subject of Zionism as a solution to the Jewish problem is intensely interesting and important. The effects of the Palestine Mandate, and the problems of Jewry throughout the world will figure in the debate.

In addition to the main feature there will be a special musical program. This will be followed by a Tea Dance for which arrangements are now being completed.

Immigration To Be Discussed At Peoples' Forum

Messrs J. C. Woodsworth and F. R. Sandwell will be the speakers at the next meeting of the Peoples' Ferum on Sunday Evening February 17, when they will have for their subject "The Immigration Problem; Can We Solve It?"

Mr. J. S. Woodsworth, Member of Parliament for North Centre, Winnipeg, has been secretary for the Canadian Welfare League, and director of The Bureau of Social Research for the Governments of Manitoba, Saskatchewan and Alberta. He is perhaps best known for his outspoken criticism of the Government, and for his uncompromising attitude towards all matters affecting the working class.

Mr. Sandwell is one of Canada's literateurs. He has held the Chair of English at Queen's University and was for some time a member of the Department of Economics at McGill. He has also been on the editorial board of several Canadian literary and financial journals.

R.V.C. Music Club To Hold Meeting

Program Consists Of Impromptu Speaking Contest

REFRESHMENTS

First, Second, And Third Prizes Awarded To Best Speakers

"Jazz is the expression of the age," was the opinion expressed by Miss Hulda Alexandor in the first of the speeches given by certain members of the R.V.C. Music Club yesterday afternoon. These speeches, which were impromtu and lasted three minutes each, were the feature of the meeting of the Music Club which took place yesterday afternoon in the Common Room of the R.V.C. Miss Alexandor's subject was on jazz. In the three minutes allowed for speech, the speaker explained that jazz was the expression of modern age, that modern dancing could not be conducted without it and that, though rather fantastical, it was effective. For this reason it should not be decried. It is merely a phase of popular music. Only when it is allowed to take the place of better music should it be banned.

The subject of the next speech, given by Miss Helena Heller, was " Is the Piano more popular than the Violin." In this, the speaker was of the opinion that the only method of solving this question was by making a study of the psychological differences between man and woman, as the man seems to prefer the violin, the woman the piano.

In the next speech, Miss Paulette Benning stated that in her belief, music as a vocation offered the most thrills, and gave the greatest scope for work in which one could never reach perfection or exhaust all the possibilities of further progress.

Perhaps the most baffling subject which was offered to any speaker, was that on which Miss Adele Languedoc spoke—"Why does Montreal, not have better concerts." Miss

Voltage Predictions 99.999 P.C. Correct

Dr. Shaw To Address Physical Society

Dr. A. N. Shaw, F.R.S.C., D.Sc., of the Physics Department will address the Physical Society today at 5 p.m., describing the results of his painstaking investigations concerning the voltage of Standard Cell batteries. This accomplishment required careful and patient investigation over long periods of time and it demonstrates the precision attainable in electrical work.

The cells have been under observation in the Physics building for twenty years. They form the basis for exact measurements in electrophysics and chemistry, since most electrical apparatus is calibrated directly with them. Unfortunately the cells are subject to variations as they age, and therefore become unreliable when the changes are unpredictable. Dr. Shaw has found formulae, which enable him to calculate accurately the voltage at any time.

Everyone, who is interested in this subject is invited to attend this interesting lecture.

Extraction Of Metals From Ores Explained

Three Different Kinds Of Natural Ores Displayed

PROF. STANSFIELD

Gave Illustrated Lecture At Mechanic's Institute Last Night

"How metals are obtained from their ores," was the subject of an illustrated lecture given by Professor Stansfield of the department of Metallurgy at the Mechanics Institute last night. Professor Stansfield first explained the various methods of extracting metals from ores and then illustrated these methods by copious slides.

Professor Stansfield opened his lecture by showing the different kinds of ore that are mined. In the first class there are those that have the actual metal in them, such as quartz containing gold, platinum that is found in Chile, and the copper that is found in it's natural state in the Lake Superior district. The second class contains oxidized ores such as bog iron or which is the same as iron rust. In the third class we have metals that are combined with sulpher.

The methods used for getting the metals out of their ores was next discussed. Firstly the mechanical method, for example gold that is washed out of sand or ore that is crushed and the gold collected by passing the crushed ore over mercury in which the gold sticks. Secondly by the furnace method, in this method the iron blast furnace is used extensively. Thirdly by the chemical method, here a chemical is used to dissolve the ore and throw down the metal. Fourthly the electrical method. In this case electricity is used to attain a very high temperature which breaks up the ore and leaves the metal. Fifthly by Electrolysis for example copper sulphate treated by electrolysis precipitates copper.

Professor Stansfield then selected various ores and explained how the metals were obtained from them. In iron ore, which is an oxidized ore, the oxygen is taken out by useing coke in the blast furnaces and pig iron is left.

To withdraw the metal from lead ore, two steps are necessary because it is a sulphide ore. In the first step the sulpher is removed by crushing the ore and exposing it to oxygen. The oxygen also combines with lead and necessitates a second step, before the lead can be removed. The lead oxide

Co-Eds Discuss Women's Rights

Status of Women Subject of Papers At H. of C. Club

Miss Gwen Roberts, as Chairman, opened the meeting of the House of Commons Club, which was held at the home of Prof. Adair last evening. The first speaker to be introduced was Miss Paulette Benning, who read a paper on the position of women at different times in the history of the world. In this she discussed the varying degrees of exaltion and degradation of the woman by the men or by their own efforts, in the various civilizations. In ancient times the women accepted men as they were and did not dream of attempting to change them. The men were all-important and ruled over the women, who as a consequence led, for the most part, very dull lives. At times women were held to be important because they were necessary for the continuance of the race, but seldom were they credited with possessing brains.

In the Babiyonian and Ancient Egyptian civilization women came to be regarded as persons, not mere chattels, and as priestesses were admitted to knowledge of religious rites. In Greece they were as a general rule useless parasites. The women of Republican Rome were considered as members of the community and held a respectable position, while under the Roman emperors they attained a better legal position than they had formerly been accorded.

Among the early Christians, women were recognized as the spiritual equals of men and their status is popularly supposed to have improved, though as a matter of fact, in many sects they were regarded as the Devil's gateway. During the Middle Ages no important new element affected woman's rank. In the Victorian era, the chief aim of women was to be good, pious and obedient.

The second paper, on the present status of women, read by Miss Betty Archdale, aroused a great deal of discussion. She stated that the action of the suffragettes was the outcome of

M.S.P.E. Dance Next Friday In Union Ball Room

The annual M.S.P.E. Dance will be held in the Union Ball Room on Friday night, the 22nd of February. The attractions of this dance will be many and varied. The music for the evening will be supplied by Izzy Aspler and his McGill Orchestra. Original M.S.P.E. decorations will convert the Ball Room into a novelty dance palace. The catering will be personally supervised by Miss Honey, who is by reputation more than equal to the task.

In former years the M.S.P.E. dances have always been successful and judging from the preparations being made this year, is expected to be as great if not a greater success.

A limited number of tickets are now on sale at the Union Tuck Shop. Tickets may also be obtained from any of the Physical Education Students.

Commercials See Movies At Lunch

Show Esquimaux And Animal Life in Far North

ARCTIC EXPEDITION

Two Members Of 1928 Voyage Present At Meeting

The picture record of the Canadian Arctic Expedition of 1928 was shown before the assembled members of the Commercial Society at luncheon yesterday. This showing was enabled through the courtesy of the Department of the Interior at Ottawa.

At the head table were Professor Sugars, head of the Department of Commerce, Col. Borey, H. U. Banks, president of the Commercial Society, Bryce MacKensie, Mr. John Culliton James P. Manion, James Carlisle, and Robert Bowman, both of whom were members of the expedition.

The main purpose of the film was to show that Canada will hold her sway over those lands to the north by the establishing of military police posts in them. Next to this is the object of exploration.

The film showed the life of the esquimaux in northern Canadian lands, and the happenings on the trip. The voyage took 18 days during which they were in danger of being ice-bound for some four days. This emmergency, however was prepared for, as there was provision on board the ship to last the expedition for a year.

A great deal of animal life in the north was depicted by the film. Polar bears and walrusses were to be seen in their natural haunts, while a very unusual picture of the musk-ox was obtained by the photographer of the expedition. These musk-oxen, when attacked by the dog, stook back to back so that their defensive position would be as effective as possible.

The terrific storms encountered on the return trip gave rise to much comment on the part of the spectators. When the traffic lanes of the Atlantic were reached, the tension was released and the picture came to an end amid the applause of those present.

Council Votes For Thorough Investigation

Will Hold Complete Inquiry At Toronto

"THE VARSITY"

"Disinterested Persons" To Conduct Probe in Squabble Over Newspaper

(SPECIAL TO McGILL DAILY)

Toronto, Feb. 14—A complete and thorough investigation of the existing method of student government is going to be made at the University of Toronto.

This decision was reached at a special meeting yesterday afternoon of the Students' Administration Council which carried a motion that the appointment of the committee, which would be left to the Caput.

This is the latest development in the Varsity newspaper dispute which has been raging at the university for the past week.

The conclusion that a probe should be made was reached as the result of a motion brought before the S.A.C. by Allan H. Ferry, who represents the Debates and Literary Committee on the joint executive of the S.A.C.

Action taken by the joint executive in the recent dismissal of L. J. Ryan Varsity editor, was approved by the Students' Council by a 7-5 vote.

Ferry's motion read as follows:

Motion for Investigation

I beg to move that this Men's Student Administrative Council places itself on record as favoring a thorough and complete investigation by a committee of disinterested persons of the present form of student government as existing in this university, with the object of recommending such improvements as may be deemed necessary. Further that a copy of this resolution be sent to the Board of Governors of the university, and to the joint executive of the two Students' Administrative Councils." This motion was carried unanimously.

Asked to define the phrase, "disinterested persons," Ferry said. "They would not be members of the Board of Governors, of the joint executive of either the Mens or the Women's Students' Administrative Councils, or of either the past or present staff of The Varsity."

The final motion of the meeting, which lasted two hours, was one expressing appreciation to Robert C. H. Mitchell, the temporary graduate editor of The Varsity, for the assistance he has rendered. This motion was carried.

Scores Joint Executive

Allan Ferry, before bringing his motion favoring an investigation, stated that the Joint Executive had acted with undue and indeed impolite haste, and without due courtesy to the student councils. The meeting of the Joint Executive, which effected

(Continued on page two.)

Varied Program Given By S.C.A.

International Week Crowned By Gig Concert

Strathcona Hall was the scene of a novel and colorful concert last night when the International Week, program reached its crowning event. It was the first program of its kind to be given at McGill, and is also the most varied. It included four choirs, a gymnastic squad, and many solos, which kept a record audience in delighted attention from start to finish.

Nearly every country of Europe was represented by members of the International Y.M.C.A. or the International Club of the Y.M.C.A. who wore their national costumes and sang songs of their respective homelands. The hall was decorated with flags and pictures borrowed from the various consulates throughout the city. The most striking feature of the evening was the informality and the cordiality which existed between the performers and the audience. Instead of using the stage as customary many artists performed upon the floor where a vacant spot had been cleared for the purpose. This made the event seem more like a party than a concert.

The first event was a Flag Presentation by members of the Y. International Club, representing, Austria, Czech, Denmark, Esthonia, Finland, France, Germany Greece, Hungary, Italy Latvia, Norway, Sweden, Switz-

CANADIAN ARCTIC EXPEDITIONS

The Commercial Society are to be congratulated on the pictures of the Canadian Arctic Expedition of 1928 which the Society was able to show to its members yesterday afternoon, through the courtesy of the Department of the Interior at Ottawa. Two McGill Undergraduates, Robert Bowman of Commerce '32, and James Carlisle, of Science '30, who acted as General Handyman and Radio Operator of the Expedition, respectively, were present and explained the films.

The main purposes of such an expedition are exploration of northern regions which are part of Canada, and to maintain dominion over these by establishing police posts. If this were not done Canada could not retain sovereignty over these areas according to international law. Supplies are taken by these expeditions to relieve members of the Royal Canadian Mounted Police who are stationed at various outposts.

The pictures shown gave an excellent view of the work that is being acomplished and the nature of the places visited by the expedition of 1928. With the development of modern aviation these expeditions are going to prove very useful in locating strategic positions at which to establish airports. Over vast wildernesses of icy seas, plunging through storms circumnavigating huge floes and icebergs, touching at stations where only a few Eskimos and their dogs are the companions of the police established there, everywhere bringing cheer and relief to dreary spots in the frozen northlands, exploring new territories, examining flora and faunu wherever found, charting routes, and hunting walruses and musk-oxes to replenish their good supplies, these are the features of the explorer's life. Such a summer adventure for undergraduates is the ideal way of putting in the period between college terms.

College Comment

TINTYPE OF AN ATHLETE

He is terribly tall and broad and could probably break an oar if he wanted to has so many sets of numerals that he gives them away upon request from his watch-chain dangle golden oars, footballs, fishes and an Ingersoll Junior next to the Nemo and three-point courses meeting once a week he likes good gin and Baker Field meals talks to profs after class because he is interested in the course and before going to bed each night, prays to Doc Barret calls August Peterson 'Gus', Benjamin Hubbard 'Ben', and leans against the door when talking to the Dean will shake hands with anybody, loves to emulate Tom Rover and can write essays from personal experience. occasionally wears a cap for no good reason, loves to be seen riding in old Fords and knows more professors' first names than any man in college is an authority on speakeasies, the Crow Indians and clothes looks well in most any situation and opening windows in stuffy classrooms is his favorite stunt expects, when he graduates, to sell bonds or be a millionaire

—Columbia Spectator

BIRKENHEAD'S ADDRESS

Each student of U. N. B. recently received a copy of the inaugural address delivered before the University of Aberdeen by Lord Birkenhead, entitled "Loose Thinking." Through the kind offices of Sir Frederick Williams-Taylor these copies were printed and distributed to the students. The subject matter should certainly appeal to every thinking person whether he be in college or not. Lord Birkenhead points out the aptness of many people in dismissing weighty problems with a few catch-words. One should give all the factors due weight and should withold judgment until a full consideration has been given the problem. He also advises students to cherish their ambition and always let this be one of the great urges and driving forces in their lives. This pamphlet has aroused a considerable amount of interest among the U. N. B. students and they wish to thank Sir Frederick Williams-Taylor for his generosity and thoughtfulness in giving them the opportunity of reading it.

—The Brunswican.

NON-ALCOHOLIC

Well, we don't pretend to see any harm in this state of affairs. Perhaps it is good for us teetotalers occasionally to release ourselves in song and imagine ourselves jolly good fellows, for perhaps then we may return to our avocation refreshed, with a new zeal. But, again, there is something to be said for consistency, too, and it should not be any more difficult to find rhymes for the non-alcoholic beverages. Ginger ale might be some stretch of the imagination be said to make one hale (hic!). Poetic fancy should certainly be able to link coffee (though that is frowned upon in certain quarters) with toffee. Cocoa-Cola would present a problem, but it *could* be rhymed with "bowler." After all, a poet has some rights.

—Trinity Review.

BOOKS VIEWED AND REVIEWED

International Studeut Publications

(*P. M.*)

In student centres this week, all over the world, thought is being directed toward matters which have an international bearing. Problems in the colleges of the North American continent do not appear to exist and thus students who find themselves in such a happy position are looking toward Europe and Asia hoping that in their small efforts they may make some progress to a greater worldwide frienship. Europe has enough troubles of her own and has adopted an introspective attitude, but it is not wholely selfcentred as they too see that conditions in Asia must be understood also.

Isolated as we are on this continent from the students of other spheres, excepting perhaps those who are fortunate enough to travel in the summer vacation and those in whose university there are students who are nationals of other countries, our only knowledge of the conditions of students in other countries is limited to periodicals and magazines. University papers may at odd moments publish some outstanding incident that has happened in another college in another land, which in itself is not representative of the general trend of things, but as a whole the student is indeed isolated.

Seeking a larger outlook in this direction students may wonder where they may in order to glean some facts of a world-wide student aspect. In the three magazines reviewed below may be found grades of student thought which may help.

* * * *

VOX STUDENTIUM: An International Quarterly published for the International Student Service; 13 Rue Calvin, Geneva, Switzerland; by Walter de Gruyter and Co., Berlin and Leipzig. One Dollar per annum.

With articles in English, French and German, the theme which Vox Studentium stresses is self-help. Work-students well known to our country and continent, especially in our own university, were before the advent of the I.S.S. practically unknown in Europe. Who can imagine an Oxford or Cambridge man doing labour? If there was any increment of income from work sources it was generally by teaching or tutoring. Depreciating currency in Europe brought about a pitiful state of affairs and under the former European Student Relief, now I.S.S., self help centres were set up. Germany appears to have been the most progressive in this direction with its student communal restaurants, hostels and libraries, and in some cases health service, but a call is made for the studying of the already existent self-help institutions in Italy and Spain.

While based on the purpose of acquainting the student world with the working world, the I.S.S. has quite recently sent out upon a new experiment, that of Cultural Co-operation. In this regard conferences have been called for upon the Jewish question in the universities, European and Indian aspects of culture and politics, and a conference of students from the Pacific countries.

The honesty of the enterprise is expressed in the editorial which states in part, "We must bring to it pure hearts and open minds, and an untiring patience. Old prejudices have to be dug up, traditional attitudes of mind faced squarely, wrong thinking and feeling towards those of another creed or race or colour cast from us, problems faced and discussed in a spirit of love, which before roused our hate. So and no otherwise can the task be begin."

* * * *

THE STUDENT WORLD: A quarterly magazine published by the World's Student Christian Federation, Geneva. One dollar per annum.

When one's eye meets such names as Henry Hodgkin, Alfred Zimmern, Kirby Page, Conrad Hoffman and Gerhard Gunther as authors of articles on world student problems, one may be fairly certain in the assumption that there is something meaty upon which to chew. Each man is a specialist in his own sphere and with such international minds collaborating in a definite object it can be seen that that object must be one worth while. It is "Ut ommes unum sint."

The federation embraces the S.C.M. units of all the countries of the world and its publication is trilingual. If nothing else it is an admirable way of brushing up one's French and German. But it is more than that for the federation is essentially a league of national movements and as such can be likened to the League of Nations in that it is bound to reflect the state of the mind of its constituent members.

Following in this tone it can be seen that the main topic of such an organisation would be the relations between the members. As nationals, their countries may be at war and obstruction may be the part which they play in the federation, but as individuals they are aiming that their contribution may be one of peace.

What troubles Alfred Zimmern most is the problem of leadership, in the various countries, which the youth must face and take charge of in their generation. Reviewing the conditions as they are after the tenth anniversary of the Peace Conference he is appalled by the demonstrations of fear. In his succinct manner he states that "The survival of the regime of fear in the post-war world is due to inadequate intellectual leadership." To him there is but one way to be taken and that is the mean between the dictatorship and the mob.

Based on the fact of the Christian ideal the Student World looks at the world politics in such a light and it is pleasing to note upholds the principle of Christianity and not Churchianity. Even though it may not be so all-inclusive as one would like the magazine is one which commands the attention and respect of all students.

* * * *

THE INTERCOLLEGIAN: A monthly magazine published jointly by the Student Branch of the Y.M.C.A. of America and the Christian Movement during the academic year October to June. 347 Madison Avenue, New York. Yearly subscription: $1.25.

All college life is not reflected in the pages of College Humour or the New Student. The Intercollegian takes its stand as the foremost in the reporting of the activities of the colleges in the States. The forty-ninth parallel is merely a hypothetical boundary and yet how much it divides us from our fellows of the south. If an insight into the thought is wanted one cannot do better than to read the Intercollegian.

It is not for us to abhore anything which comes from the United States for as we ape them in most things why should we not try to find out something of their attitude to the things which we hold in common. Most of us are floundering in the morass which we call personal religion and Henry P. Van Dusen shows some very good points in his "How" of religious discovery. If there were nothing else to recommended it would be criminal to overlook the articles by Rufus M. Jones and Reinhold Neibuhr.

Races prejudices is a failing that is coming to most of us but we do not worry over the whys and wherefores. Dr. Bogardus as reviewed some of those which make themselves asserted amongst college students. The habit of scenario and fiction writers of choosing villains from the lower-class level of some foreign race; the marked difference in colour of skin shape of the eyes, nose and lips, are two of the nine which he traces and on reflection we can see that they have perhaps influenced us more than a little. Since race prejudice is a sentiment, he continues, it is an acquired trait, and since it is an acquired trait, it may be controlled and prevented to a surprising degree.

(Further information of these three magazines may be obtained on application to the Secretary, Strathcona Hall.)

St. Lawrence Canal Project Not Beneficial

(Continued from page one)

should be entirely free from the supervision of college authorities, with Reid and McNaughton arguing for the affirmative against Fulford and Tough.

Reid, the first speaker for the resolution, believed that students at college should not be treated as public-school boys or as morons; they should be given full autonomy. He mentioned the fact that the "Daily" is not a free paper because of one of the limiting clauses in its constitution which states: "The McGill Daily shall not criticize any action by the Students' Council. It shall take an impartial attitude." Man, he conceded, is not infallible, but if anything objectionable did appear in the paper, it would right itself in the course of time.

"A college paper should seek to benefit the college and not to be the organ of one group," stated Fulford. Since there are always some people who have not the power to discriminate between that which is, and that which is not fit to be read, he held there should be some sort of supervision. The college authorities are the most competent to judge and they should be allowed this right. If a college publication would consistently follow its purpose, there would be no need to have supervision, but as there is always a tendency to deviate from that policy it should be subjected to supervision.

Cites "Varsity" Editorial

McNaughton supported the freedom of the press, citing the example of the suppression of an absolutely harmless editorial in the "Varsity" to support his case. The Fortnightly Review, published a few years ago, was established to make up for the lack of freedom of expression in the "Daily."

Tough, of the negative, held that college authorities should censor the paper so as to suppress license so often mistaken for freedom. Since the authorities are responsible for the good name and the welfare of the college, they should be allowed censorship of the paper. The Editor should not autocratically dictate what is to be said and what not to be said.

Reid then spent a few minutes refuting the arguments of the negative. The judges delivered an unanimous decision in favour of the negative.

Sunday Named Day Of Prayer

(Continued from page one)

men are honoured because they give up all earthly goods for the sake of religion. There the most influencial national leader is a man universally regarded as a saint. Thus it is that those who as Christians believe in international brotherhood must ask themselves how far the ideals they profess are rooted in religious conviction.

Mr. Toychiko Kagawa writing from Japan to the W.S.C.F. says, "The future victory of Christianity depends upon Christian love being shown in practical life so that the death of Christ in sacrifice is greater than the death of Buddha. The International Missionary Council at Jerusalem dedicated themselves to the great secular tasks that confront men of goodwill connected with the problems of race, industrialism and of war.

Therefore the call is made for prayer. Prayer is the outcome of life and if people are content to make great claims for the Christian faith, while witholding the unreserved service demanded they do not do the things that are commanded.

Versatile

"That's a twelve piece orchestra."

"It doesn't look like it."

"Yeah, those six men can play ten different fox trots and two waltzes."

Ex.—

Correspondence

The Editor,
McGill Daily.

Dear sir,

We are two exotic readers of the column of your sheets, and we wish to catch him your attention to the remarkable person who have visit McGill this weak end, and who have not been noticed enough. We reefer to the gentleman by the name of Graham Spry.

This, roughly, from the Daily, is, about him, by us, quoted:—Last Thursday: "The L——Club will be addressed by MISTER Graham Spry." Last Saturday: "The L——Club is to be addressed by DOCTOR Graham Spry." Last Monday: S.C.A. report "The L—Club was addressed by SIR Graham Spry."

Truly he is a man of yeast, for neither of us (or the other) have ever see such a rising gentleman. Ten pities he should not stay three, four, maybe two days more for he would perhaps rising very high bigger. Who knows, he might have go up to KING, like the present premium of Canadia.

Thank you, thank you, and we have the odour to be, Sir,

Yours censorely,
BILL SUDSKI, Pharmacy '32.
MISS O'LINI, M.S.P.E. '31

P.S. We have snatch to two concludences: (1) The Prince of Wales is tripping here inrecognization. (2) Somebody is jolking and trying to push our leg (each one).

Council Votes For Thorough Investigation

(Continued from page one)

the dismissal of Ryan, was summoned by phone, and was held at four hours' notice. Mr. Ferry pointed out that such hasty meetings were against the constitution of the Joint Executive, which calls for notice of meetings.

The business of arranging the matter to be presented before the Board Governors at their meeting this afternoon occupied the former members of The Varsity staff last evening.

George McGillivray, S.A.C. President, stated that during the past year the books of the Joint Executive were audited monthly during the present year they were being audited four times during the academic year. This statement was made in answer to allegations that have been made concerning the finances of the S.A.C.

Varied Program Given By S.C.A.

(Continued from page one)

zerland, and Canada. After all had assembled on the stage "O, Canada" was sung. Two numbers were rendered by the Y.I.C. Choir, then Miss Scherifer sang an Austrian song which met with great applause. The next item was the Ukranian Choir under the direction of Professor Basso. John Sozansky, Science '4, gave a brief introduction explaining that the number "Tandura", was a fantasia portraying Ukranian life. The selection was received with thunderous applause and the choir was not permitted to retire until they had promised to perform again later in the evening.

During the intermission which followed an impromotu conversat was held. In order that all present might exchange ideas.

The remainder of the program was devoted to calisthenic demonstrations and folk-dancing. The Ukranian choir completed the program with two more selections which met with the unrestricted approval of the audience.

Cagemen Leave Last Night On Western Trip

Will Meet Varsity And Western U. In League Fixtures

VARSITY LEADS

The McGill senior intercollegiate basketball team left last night on their trip to London and Toronto, where they will meet Western and Varsity in regular league fixtures. Coach Van Wagner's protoges are determined to stay in the running and there will probably be great doings when they stack up against the blue on Saturday night.

The Varsity quintet are leading in the race with two victories and no losses to their credit. Their second tussle was by no means a "sure thing" Western providing plenty of opposition against the Toronto basketeers. The London city squad have not won a game this season but their recent showing against the league leaders puts them in a more favorable light.

The McGill coach took nine players along on the tour. Tonight's tilt against Western should provide thrills aplenty. With Don Young at centre flanked by Faulkner and McLean the red and white present a strong forward line which will not be easy to stop. Young has been performing in sensational fashion during the past few weeks and should prove particularly effective at the pivot position.

Captain George Faulkner was off in his shooting in the last clash with Queen's but has shown great improvement at practices. Tonight's engagement will probably see him again to the fore. McLean fits in nicely with Young and Faulkner, his ball handling proving a great asset. Grossman veteran forward may again see his old stellar form on the front line.

Silverman, Pelker and Rice are three guards who can go the full route and the McGill coach can rely on a steady defence. They will have their work cut out when they meet Toronto tomorrow night. The Varsity aggregation are a formidable lot and will bear close watching.

Smaill and McBroom, the two youthful forwards who have been in the limelight lately as a result of their outstanding performance should prove of great help during the week end.

The game tonight should be a close one with the edge if any in favor of McGill. The redmen found little difficulty in downing Western here and should be able to repeat. The London city squad will be playing on their own floor this time and will probably put up a better fight.

Tomorrow night the McGill players face a real task when they will line up against Toronto. Although Varsity have shown better form than any other team in the league this year the possibilities of a red and white victory are not remote. The redmen have usually been a "jinx" to the blue and this may again prove the case. At any rate there should be plenty of action in the Hart House gym on Saturday night.

If the McGill team wins both games the long-sought intercollegiate crown will loom much nearer than it has in the last few years.

R.V.C. Music Club To Hold Meeting

(Continued from page one)

Languedoc explained that she was not in a position to offer a solution to a problem which puzzled all of the music-loving people of this city. The reason that good concerts, like good dramas, do not come often to Montreal is evidently the fact that they are badly supported, and to give as a reason for this that there are not enough people who can afford to go and hear them is absurd. Local talent should be developed and the people, instead of going elsewhere to hear good music should make some effort to see that good music is brought here. After all, it is up to the public, since it is they who make the complaint.

Miss Anna Tritt spoke on "Music and Love." It was the opinion of the speaker that music offers the greatest scope for the expression of love of all the arts.

Miss Margaret Smythe spoke on the most universal kind of music—the love-song.

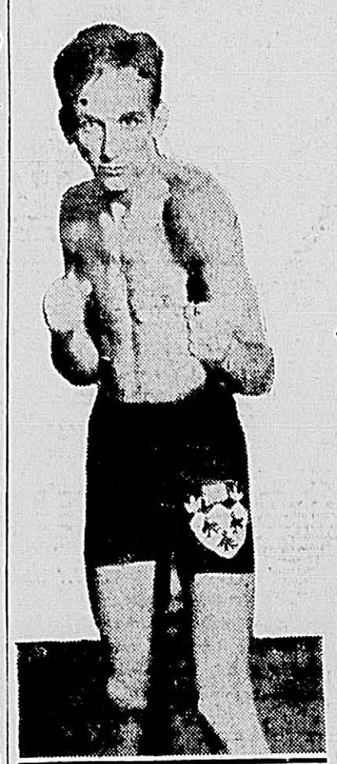

"Canned Music" was the subject of the speech given by Miss Ann MacFarlane. In this, the speaker stated that music produced by the radio and the phonograph was a great blessing to the ordinary person; he was enabled to hear the best and learn proper appreciation of music without being obliged to possess talent himself.

The last speech of the afternoon was given by Miss Marjorie Creighton. Her subject was "Compare the music of the Red and White Revue with that of the Choral Society." Miss Creighton stated that although the students who composed songs for the Revue deserved credit, their work did not bear comparison with that of Gilbert and Sullivan.

While the judges, Miss Foster and Mrs. Vaughan, were making their decision as to who deserved the three prizes offered to the three best speakers, Miss Gwen Peden gave two violin solos and Miss Marjorie Hadwin two piano solos, which were enthusiastically received by the audience.

By the decision of the judges, the winner of the first prize was Miss Hulda Alexandor, the second, Miss Adele Languedoc, and the third Miss Margaret Smythe. Mrs. Vaughan then made some closing remarks, after which the meeting was adjourned and tea was served.

Promising Members of McGill Assault Team

—, 135 lb. boxer, who is expected to make a good showing in the assault at Kingston tonight.

COLIN COPEMAN, whose steadiness and aggressiveness in the ring will be a big factor in his showing at Kingston.

MURRAY SAVAGE, former R.M.C. star and champion of the 160 lb. class, who will be in action tonight.

TOM FYSHE, 118 lb. McGill fighter, who will be out against the Varsity and Queen's fighters this week-end.

Assault-At-Arms Opens Tonight

B.W. & F. Team Entrain For Kingston This Morning

The McGill B.W. & F. team left this morning for Kingston where weighing in for the intercollegiate assault-at-arms tonight and tomorrow night will take place this afternoon. Teams from Varsity and Queen's are also entered in the meet and are expected to arrive in the limestone city sometime this morning. The McGill team will be accompanied by Coaches George Smith and Bert Light as well as Major Forbes.

Tonight the semifinals will be run off in the Queen's gym with the finals on Saturday and the red boxers and wrestlers are all set for the fray. Coach Light stated yesterday that he has one of the best boxing teams in several years and sees no reason why the local men should not capture a good share of the titles while the wrestlers, though still in a weakened condition from the loss of men by injuries and examinations have several men on their line-up who can be counted upon to make a good try for a title. The fencers are quite capable of looking after themselves and expect to cop the two points awarded to the team turning in the highest score.

The Varsity line-up this year is entirely new with the exception of Jackson the formidable light-heavyweight who is the present holder of the title. Little information in regard to the rest of the team is available but they will probably have a pretty strong line-up judging from the number of men who turn out for practices Queen's claim to have an equally strong team and in their meet with the local Y.M.C.A. won half of the bouts; however, the McGill men have turned in good showings against the Y boys and in some cases have won their bouts.

The McGill entries are as follows:

Fencing

Brown, Desbarats and McKergow.

Wrestling

112 lbs.	Harris
118 lbs.	Lapin
123 lbs.	Giulianelli
134 lbs.	Golfman
145 lbs.	Wise
158 lgs.	Clarke
175 lbs.	Tedford
Heavy	Default

Boxing

112 lbs.	Kussner
118 lbs.	Fyshe
126 lbs.	Copeman
135 lbs.	Craig
145 lbs.	Gillard
160 lbs.	Savage
175 lbs.	Supple
Heavy	Fred Taylor

Snowshoe Race

The snowshoe branch of the Winter Outing Club will hold a two mile race on Saturday morning at 12 o'clock.

This event will serve as the official trial for the intercollegiate race at Lake Placid, Feb. 25th, 26th.

Gym Team To Meet Varsity

Attractive Program And Dance Arranged

For the last time this season the McGill Gym Team will appear before a McGill audience. The Intercollegiate Meet will be held in Toronto this year, and some of McGill's finest gymnasts will represent their college for the last time in Intercollegiate gymnastics. The men who will graduate in the spring are Willie Consiglio, whose versitility in sports has made him one of McGill's outstanding athletes, and Ned. Pacaud, this year's captain, who is now serving his fourth season on the team.

The McGill team ranks higher than any other in Canada both as a team and individually. Every member of the squad has been on at least three previous intercollegiate gym teams, and every member of the regular, team, with exception, has at one time or another held the captaincy.

Probably the more interesting half of this evening's exhibition will be supplied by the girls of the R.V.C. and the M.S.P.E. These young ladies are putting on several costume and character dances. The program, it will be seen, is so arranged as to provide the maximum of variety, with a clog, a character, and a pirate dance. The executive has noted from past experience that these dances are always enthusiastically received.

After the last number on the program, there will be informal dancing for any of those present who wish to remain.

The music will be supplied by musicians who are well known about college. The program will start strictly on time, in order to allow for the dancing which will follow the exhibition. In pursuance of the policy of the gym club no admission will be charged.

Gym Team

C. E. Pacaud (capt.), W. Consiglio A. Holland, D. DeW. Mackay, Ray Caron, Weir Davis.

Program

1.—Horizontal Bar	Gym Club
2.—(a) Athletic Dance	R.V.C.
(b) Clog Dance	R.V.C.
3.—Parallel Bars	Gym Club
4.—Character Dance	R.V.C.
5.—Horse	Gym Club
6.—Clog Dance	M.S.P.E. Year I.
7.—Mats	Gym Club
8.—Pirate Dance	M.S.P.E. Year II.

Dancing.

Gym Exhibition At High School

The Gym Club will hold its annual exhibition in the gymnasium of the Montreal High School this evening at 8 o'clock. The Department of Physical Education for Women will contribute a number of dances. A similar program was given at the Intercollegiate Gym Meet, when the event was held at the Central Y.M.C.A. last year.

The gym team which is composed of Captain Ned. Pacaud, W. Consiglio, Al. Holland, de Wolfe Mackay, Ray Caron, Wiot Davis and George Dumbell, will give exhibitions on the high bar, parallel bars, horse and mats. It is expected that the program will be concluded by 9.30, after which there will be informal dancing for those who wish to remain.

Students and all others interested are invited to attend. No admission will be charged.

Outing Club Holds Trials Tomorrow

McGill Men Enter Intercollegiate Meet

With two events on the program the Winter Outing Club will continue its preparation for the Intercollegiate Winter Sports Championships at Lake Placid on the 25th, and 26th of this month. The snowshoers and the skiers will be seen in competition this week-end, when the official trials will be held in the two mile snowshoe event and the skiers hooks up with the Red Bird Ski Club in a competitive slalom.

The two mile snowshoe race will be the big local event of the season for the McGill exponents of this sport. The first two men will represent the university in the intercollegiate meet at Lake Placid. The course that has been arranged is a very fair test of speed, endurance and general proficiency. Crossing a steep slope, the snowshoers' 'bete noire' has not been forgotten, but the long stretches of smooth going will give the runners a chance to show good time.

The Red Bird Ski Club, an organization of McGill graduates have arranged to hold a slalom on Saturday afternoon at 2.15. The event is open to U. of M., Loyola and Ottawa Collegiate, entries already having been received from these points. The McGill ski team has filed its entry 'en masse' and any others who wish to compete have only to give their names to Harry Pangman any time before the start of the event.

Co-Eds Discuss Women's Rights

(Continued from page one)

centuries of women asking and waiting for the rights. The methods used by the suffragettes to win the vote for women, though commonly supposed to be extreme and unnecessary, were in reality not nearly so violent as those used by the men for the same purpose. A heated argument followed concerning the meaning of the phrase 'women's rights' and the question of whether a single standard for both sexes is advisable. This was continued during supper, till the gathering broke up. The date of the next meeting will be announced later.

Seniors Lose To Freshettes

First Year Girls Remain Undefeated

The R.V.C. Freshette basketball team remains undefeated. The play-off game yesterday, against the Seniors resulted in a win for '32, the score being 46-39. This win gives the Freshette squad the Interclass championship for this year.

The game was fast and close throughout, each side striving for the title at stake. Fourth year started the scoring with two quick baskets. First year got going and the score was tied. The steady defensive playing of Archdale kept Chrisolm from scoring as often as usual. Fourth year were playing without Agnes Morton one of their regular defense. Both teams, but especially the Red were called time and again for fouls. The score ended in the first half, 17-15 for fourth year.

The second half of the game was extremely close. First one side led, then the other. First year seemed to be the victors. Then the Seniors scored four goals and it looked as though they were away. The Freshettes, determined to win, got the lead again. The Senior quintette put up a plucky game but they could not hold the First year team and the final whistle went with the score 46-39.

While the majority of the rooters were for the Seniors yet the Freshettes victory means that there will be good material for Intercollegiate teams for the next three years and McGill's chances in the meet look promising. The line-up of this years team will be published soon.

Seniors		Freshettes
	Forward	
Whitley		Chisolm
Johnson		Baillie
	Centre	
Snyder		Allen
Davidson		Peden
	Defense	
Peters		Dodds
Archdale		Jeffrey

Equipped with a bow-rudder, a new service that will aid in navigating the harbours of Victoria and Vancouver and the waters of the British Columbia coast, the Princess Norah has arrived on the Pacific seaboard to join the fleet of the B.C. Coastal services of the Canadian Pacific Railway She is the eighteenth ship to be built for this work and has just been constructed at the ship yards on the Clyde in Scotland.

Some foundation for the old nickname "wooly" west is found in the report that Alberta's wool output for 1928 amounted to 3,033,181 pounds. Altogether the Dominion produced over eighteen and a half million pounds.

Girls Don't Wear

Red Flannels!

There can be no argument about it. With the filmy finery that constitutes the entire wardrobe of the modern lass . . . we are absolutely positive that girls don't wear red flannels.

Now, everybody knows that red flannels keep one cosy and warm. Therefore if girls don't wear red flannels, it stands to reason they must, upon occasion, be quite cold these frosty February days.

Now, nobody likes a cold girl. On the other hand nobody wants girls to start wearing red flannels. So, the question is how to keep girls warm without having them don red flannels.

There is only one answer to such a question: Take them here and there and bring them back in a Standard Cab. No red flannels are needed in a Standard, because all Standard Cabs are heated to such a cosy, comfortable degree that red flannels are entirely uncalled for, not to say superfluous.

Standard Cabs
UPtown 6303

Stonehenge Is Puzzle Of Past

Dr. Clark Delivers Lecture On Human Race

"Stonehenge presents one of the outstanding mysteries of the past", said Dr. Clark last Tuesday night in his lecture on "The department of the Human Race'. Attempts to solve the problems attached to it, only result in the disclosure of new ones.

The manner in which these primitive Britons conveyed the stones of the second circle across 150 miles of rough country in unknown, and most likely will never be understood. The only explanation is that these people were a race which kept slaves. The only possible explanation for the existence of Stonchenge is that it was used as a temple of some sort. In support of this theory, it has been found that a line drawn exactly through the center of the temple shows the exact path of the setting and rising sun on the longest day in the year.

In dealing with the races on the continent at about this same time, Dr. Clark mentioned a race which lived in houses built on piles driven into the bottom of some of the lakes in Switzerland. These people were about the most advanced of any of the races up to that time. They were weavers, and turned out a product which can be favourably compared with modern products though, of course, somewhat coarser.

The next lecture, which will be the concluding one for this course, will deal with the races of the Metal Ages and will bring the course practically up to modern times.

Good Will Loan For Canadians

Students Have Use Of Novel Plan At Antioch College

A student loan fund to promote international good will among the young men and women of Canada, the United States, and Spanish America, has been established by Mr. Peter E. Alliot, of New Jersey. Antioch College, at Yellow Springs, Ohio, has been chosen as the institution where students can take advantage of this fund.

Canadian students have been attracted to Antioch because of its novel plan for combining in a single organized program a liberal education, training for a calling, and practical experience in real life. Half the students study at college while the other half work in industry.

In this part-time work, students are placed in carefully selected positions of unusual educational value in business, journalism, education, engineering, home economies, scientific research, and many other fields. Two students alternate on each job in shifts of five or ten weeks. Antioch students are engaged in about two hundred firms in sixteen different states. This part-time work, under experienced direction, helps young people to determine their callings, and to prepare for them. It also enables the students to pay about half the cost of a college education.

Antioch students are carefully selected. They come from all but two of the forty-eight American states, from several Canadian provinces, and from foreign countries. At no other American college is the student body of young men and women so representative of every part of America and all phases of American life. A considerable proportion of the students go into graduate study, education, or scientific research. The standards of the college are high, and only student capable of excellent scholarship and those of substantial capacity for the development of character and self-reliance, can be accepted.

Information about the loan fund can be had by writing directly to Antioch College at Yellow Springs, Ohio.

McGill Chess Club

"C" Team Plays Important Match On Monday Next

The 'C' team of the Chess Club will play its next regular league match on Monday, February 18 at 8 o'clock in the evening when the St. James Club will be the hosts. At present, McGill leads the division having half a point more than its nearest competitor which is the St. James Club. It is therefore very important it is pointed out that everybody be out on time and play to score a victory as a win would put the team in an excellent position for the championship. The following must appear at the appointed time. Dr. Williams, Victor, Billette, Berger, Pimenoff, Gold, Levitsky, Aber and Shapiro.

The St. James Club is situated at 686 Ontario St. East.

Those Bedroom Farces

At one of your theatres the leading part is sometimes played by an "un-dies-study."

Plane Performs Various Tasks

Of Great Value In Federal Administrative Work

"When the aeroplane, a decade or more ago, began to be used as a means of transport its value in overcoming the difficulties inherent in travelling over the type of country found in Canada's northern areas was at once recognized." This was one of the significant statements made by Mr. W. W. Cory, Deputy Minister of the Interior, in a paper presented at the International Conference on Civil Aeronautics, held in Washington, D.C., in December.

The paper was entitled "The Aeroplane and the Department of the Interior—Its value in the Administration of one of Canada's Governmental Departments." In the opening paragraph Mr. Cory stated that the Department of he Interior, which came into being shortly after Confederation, was formed to administer Canada's Dominion lands. These originally included all of Canada north and west of Ontario and Quebec, excepting British Columbia. In the sixty years since Confederation he said, large areas have been settled and otherwise alienated but there still remained in Dominion lands, stretching back from present settlement to the slands in the Canadian sector of the Artic, more than one half of the total area of the Dominion—a region in which could be placed forty countries of the size of England.

The physical difficulties of administering this northern area where there were no railways, no roads, and, with one or two exceptions—such as that of the Mackenzie River system —no steamboat routes, were sketched and the limitations of travel by canoe and dog team were indicated. It was for these reasons as stated above, that the Department of the Interior had so warmly welcomed the areoplane. Mr. Cory pointed out that the Department had not gone into the business of operating the planes but had maintained close co-operation with the Royal Canadian Air Force, the latter furnishing the planes and the officers to operate them and the Department of the Interior, the officers to accompany the plane and direct the particular work undertaken. The Department had put the aeroplane to two major uses to the protection of the forest and to the surveying and mapping of the country.

The various methods of using the plane by the Forest Service in protection work and forest estimating, and by the Topographical Survey in surveying and mapping were gone into in detail. The Dominion Forest Service in its work in Alberta used only land planes and these, because of lack of suitable landing places, could be employed only for detection purposes, wheras the seventeen aircraft which last summer operated in northern Manitoba and northern Saskatchewan were, because of the abundance of small lakes all seaplanes. These were used not only for detection but for carrying crews to put out fires when discovered. By the use of aeroplanes it had been possible to make a detailed estimate in one season of the pulpwood on an area of 15,00 square miles in Manitoba.

In the work of the Topographical Survey the aeroplane was finding an increasingly useful place. Canada's problems were peculiarly her own and her citizens might well be proud of the way she had developed, to fit her needs, the new science of maping by aerial photopraphy. Since this method of surveying was adopted by the Department in 1921 over a quarter of a million square miles had been covered by aerial photographs. The areas covered included large blocks in the northern parts of Ontario, Manitoba, Saskatchewan, and Alberta, and smaller blocks in Eastern Canada in southern Alberta, and southern British Columbia.

One great advantage of this aerial work was that the same photographs that were used for the general mapping of the country could also be used for specific purposes, as for example: forest type mapping, study of water-power resources, the location of transmission and railway lines, and so on. One of the recent achelvements in aerial work was the surveying of the Lac Seul area in western Ontario in one summer, whereas by ordinary methods this would have taken two or three years. Like all new things, Mr. Cory said, the aeroplane had doubtless improvements ahead of it and the Department of the Interior would be interested in all that would make the plane a better agency for carrying on the work of administration.

Players' Club

Will everybody please attend their rehearsals on time. Your delay keeps all others back.

REHEARSALS FOR TODAY

5:15—Act III and Super Ants.

Rehearsal will take place in Strathcona Hall.

SATURDAY

2:00—Act I.

3:00—Act II.

SUNDAY

3:00—Full rehearsal. Prologue, Acts I, II, III, and the Epilogue.

Historical Club Will Hold Forum

G. V. V. Nicholls And H. C. Reid To Present Papers

Dr. C. F. Martin, Acting Principal of the University has offered his hospitality to the Historical Club in the absence of Sir Arthur Currie, its Patron, and will be host to the Club at his residence on Tuesday, February 19th. The meeting had originally been arranged to met at Sir Arthur's house in the expectation that he would return in time. Dr. Martin's address is 686 Mountain Street.

The papers will deal with Canadian subjects, in conformity with the Club's custom of having at least one Canadian night each season. G. V. V. Nicholls and H. C. Reid will speak on "Nova Scotia before Responsible Government" and "The Colonial Office and Responsible Government in Canada", respectively.

The constitutional question in Canadian history has always been one of great importance, and the struggle for responsible government is one of the outstanding phases of the question. In Nova Scotia the agitation began early and was carried on vigorously during all the time in which the troubles of Upper and Lower Canada, though there was never such an outbreak in the Maritimes. Joseph Howe is the central figure of Nova Scotia's history at this time.

In Canada proper, however, the leading figures are numerous and it is more difficult to assign the bulk of the credit for responsible government to particular individuals. In both cases the Governors appointed by the British Government were often ranged against the public opinion of the provinces. It is expected that the papers will deal with this respect of the time especially.

The meeting will begin at 8.15 on Tuesday evening and members are urged to attend if possible.

Red And White Revue Notes

Luncheon for the executive committee in the Union at 1 o'clock.

Aspler, Reid, and Freiman to rehearse at 12 o'clock in the Union.

Extraction Of Metals From Ores Explained

(Continued from page one)

is then placed in a blast furnice in which coke is used and the oxygen is removed.

In the case of gold ore, the mechanical method is not used much nowadays. The modern method of extracting gold from ore is to crush the ore and treat it with sodium sinate soluton. As the sodium solution has a great affinity for gold, zink is used to remove it from the solution.

Professor Stansfield concluded the lecture with many slides showing pictures of the different blast furnaces used.

Notices

Notices must be legibly written on one side of the paper only and must be in the McGill Daily office before eight o'clock on the night previous to publication. Brevity is essential. Under no circumstances will notices be accepted over the telephone.

INTERFACULTY BASKETBALL

All faculties wishing to participate in an interfaculty basketball league are asked to communicate with F. M Van Wagner, at 3484 University St. as soon as possible.

ATTENTION EXECUTIVES

Clubs, societies, and executive groups wishing to have their pictures featured in the Annual this year must make arrangements to have these taken as soon as possible. A receipt form for $7.00 when presented at Notman's entitles the group to a sitting. These receipt forms may be obtained from George Brown, Arts 4, Gilbert Brighton Commerce III or William F. Thomas Sci. 3 Kindly get in touch with the above as soon as possible.

ROWERS—ATTENTION!

The machines are now in our quarters in the Field House. Please remove clothing from the room in the Union as soon as possible. Lockers will be supplied. Training hours—3 to 6, every day. Everybody out.

ARTS II

Watch Daily for Faculty of Arts Basketball notices.

SUSPENSIONS FROM ATHLETICS

Gregory, R. A.; Med. III.
Minnes, H. E.; Med. III.

REINSTATEMENT

Rivenovitch, I. A.—Arts I.

ATTENTION R.V.C. '30, '31, '32

There will be an important meeting of R.V.C. '30, '31, and '32 on Tuesday, Feb. 19 at 1 p.m. in the R.V.C. Common Room. Business:—to make arrangements and elect committees for the annual Senior Dinner A full attendance from the three years is requested.

Isabel E. Alexander,
Pres. R.V.C. '30.

R.V.C. SKI CLUB

There will be a meeting today at 2.45 in R.V.C. Everyone is asked to attend as there will be a business meeting first and then a run.

SCIENCE VS. THEOLOGY

Basketball game between Science and Theology was postponed from Thursday and will be played today at 5.15 in the boys' gym.

HARRIERS NOTICE

The Harriers who ordered pictures may get them now at the Union Tuck Shop. Remember it is a strictly cash transaction.

HISTORICAL CLUB

The Seventh regular meeting of the Club will be held at the residence of Dr. C. F. Martin, 686 Mountain Street, on Tuesday, February 19th at 8.15 when G. V. V. Nicholls and H. C. Reid will read papers on "Nova Scotia before Responsible Government in Canada," respectively.

CHESS CLUB

The "C" team plays against St. James at the latter's clubrooms on Monday the 18th at 8 p.m. This is the crucial game of the series. Everybody must turn out. The following must appear at the appointed time: Dr. Williams, Gold, Pimenoff, Levitsky, Victor, Billette, Berger, Aber and Shapiro.

The St. James Club is situated at 686 Ontario East.

SOUND AND MUSIC

A course of ten lectures will be given by Professor H. E. Reilley on "Sound and its Relation to Music." These lectures are intended primarily for the students of the Conservatorium of Music, and all others interested in the scientific principles underlying music. The lectures will be illustrated with experiments.

Lecture hours:—Wed. 5-6 p.m., Sat. 10-11 a.m. First lecture will be given on Sat. 16th. inst.

PHYSICAL SOCIETY

The regular meeting of the Physical Society will be held at 5 p.m. today. Speaker, Dr. A. N. Shaw, F.R.S.C., Subject—"Recapturing the Volt to within One Part in a Million."

BADMINTON DEMONSTRATION

There will be a special demonstration of badminton by Mr. C. F. Argue and C. F. Aikman in Convocation Hall this afternoon at 5. They will be assisted in exhibition games by Mr. Billham and Mr. E. T. H. Seely. Open to men and women students and their friends.

MEDICAL SOCIETY

The next regular meeting of the Medical Society will be held on Monday, February 18th at 8 p.m. in the Assembly Hall of the Medical Building.

Program:—

1—Case Report.

2—"Medical Students and the Doctor's Dilemna," Dr. Horst Oertel.

3—Refreshments.

"HOW AN AEROPLANE FLIES"

Pierre Franck, engineer in chief of aeronautics in France, will be the speaker at a combined meeting of the Sigma Xi Society, the McGill University Light Aeroplane Club and the McGill Physical Society, to be held on the evening of February 25 in the Macdonald Physics Building. The lecture, which is open to the public, will deal with how an airplane flies.

Dr. Sederholm, Director of the Geological Survey of Finland, will deliver a special lecture on "Methods of correlation of rock formations of Pre-Cambrian age," in the Redpath Museum, McGill University, on Monday February 18th, at 12 o'clock.

All those interested in this subject are invited to attend.

R.V.C. '32

All interested in hockey please turn out from 4-5 today.

LOST

At the Plumber's Ball, Cameo from ring. Finder please notify W. Stockwell. Telephone UPtown 5500.

HORLICK'S MALTED MILK

A well-balanced, tempting, easily assimilated food-drink that nourishes and upbuilds. Taken hot at night, it brings refreshing sleep.

Instantly prepared in water or milk.

Take a package home.
